

XR Instructor

Teach

If you want to create VR Lessons, start and stop sessions from your PC and watch the streams, you can use XR Instructor.

Watch this video for a more detailed demonstration: [Dutch version](#) [English version](#)

How to start using XR Instructor?

- Go to the XR Platform

The screenshot displays the 'Dashboard Teach' interface. On the left is a dark sidebar with a 'Trainer' dropdown menu and navigation links for 'Dashboard', 'Lesson Content', 'Objectives', and 'Organizations'. The main area is titled 'Dashboard Teach' and includes a 'Today's sessions' section with a table that currently shows 'No results found.' Below this is the 'Lessons' section, which contains a calendar for 'jan. 2025'. The calendar grid shows dates from 1 to 31, with the 15th highlighted in blue. To the right of the calendar are two buttons: 'Plan Lesson' and 'Launch XR Instructor', with the latter button circled in red.

- Press 'Launch XR Instructor'.
