

FAQ

XR Instructor

How do I start XR Instructor?

Go to the XR Platform and Launch XR Instructor

The screenshot displays the 'Dashboard Teach' interface. On the left is a dark sidebar with a 'Trainer' dropdown and menu items: Dashboard, Sessions, Lesson Content, Objectives, Organizations, and Persons. At the bottom of the sidebar is a circular logo with 'NV'. The main area has a header 'Dashboard Teach' and a 'Today's sessions' table with columns for Start Time, End Time, Active, Activity, and Participant. Below this is a 'Lessons' section with a search bar and a calendar for February 2025. The calendar shows dates from 1 to 28, with the 26th highlighted. Two buttons, 'Plan Lesson' and 'Launch XR Instructor', are positioned above the calendar, with the latter being highlighted by a red rectangular box.

My VR devices are connected to wifi and the XR Instructor but won't stream. Why?

Network security

Some networks have more security than others. Try connecting a VR device to a good hotspot (your smartphone, MIFI Router, etc). If it works with the hotspot, the problem is network related. Keep in mind to test the network if you're in a different location and make sure to have a connection back up plan.
