

# Onboard Meta devices on the XR Platform

To onboard a Meta Quest device you will have to do the following

- Set up a Meta developer account with Two-factor authentication
- Factory reset your Meta device
- Download and install the Supportsquare XR Installer to your Windows PC
- Install the Supportsquare Appmanager onto the Meta Quest device during the Meta setup steps

## Warning

Performing a factory reset will wipe away all applications and files on the headset

## Set up Meta developer account

- If you already have a Meta developer account with Two-factor authentication and an organisation, skip this step
