

Customize your Avatar

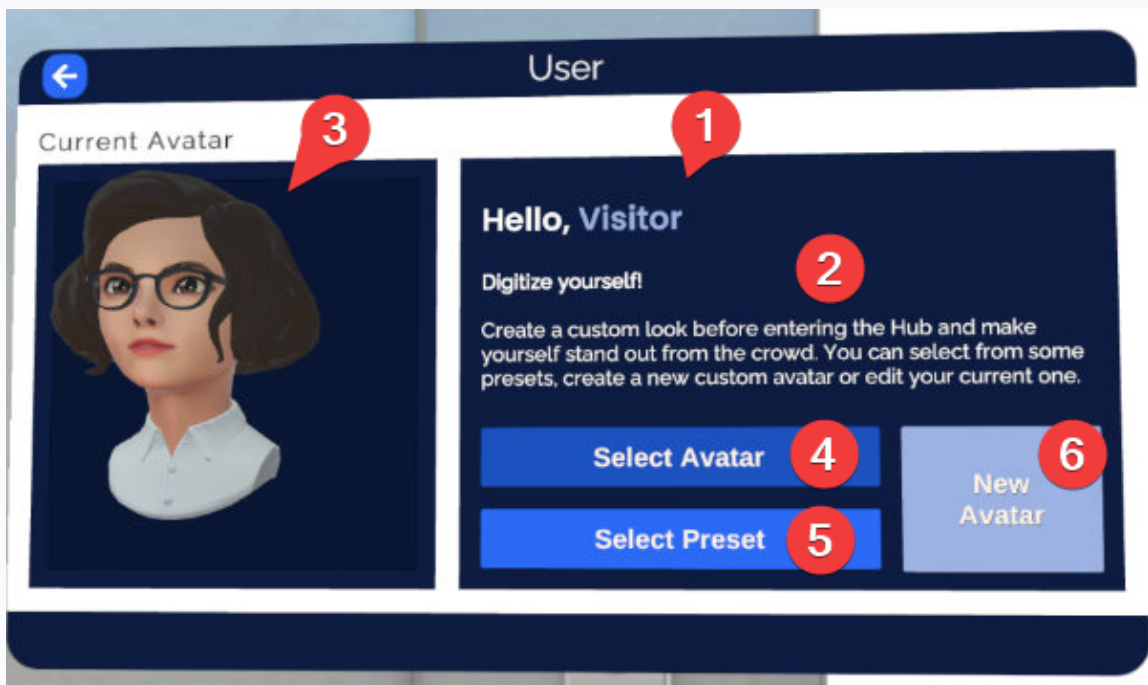

When you join a session in the Explore you need to identify yourself in a unique way. For that we have an avatar system where you can customize the look of yourself according to your liking. Pick your clothes and accessory's, glow up and make it your own!

1. The avatar Screen

Note

Current Avatars are locally saved only. This means we only remember them on the devices you use. They are not yet linked to an account or identification.

When you start the Explore application you find yourself in the Start scene. In front of you is the main login screen, the "join hub" button and to the right the **Avatar Creator** screen. It is that screen we will focus on.

These are the main elements that are on the start screen of the avatar creator:

1. Name
2. Welcome text
