

How to create a Content Package?

You can add a content package to subscriptions. You only have to do this once if you want to distribute the same content.

- Go to the XR Platform

Note

Make sure you have the **Administrator** role. You can change roles by clicking on them and switch to another one in the list.

The screenshot shows the XR Platform interface. On the left is a dark sidebar with a navigation menu. The top of the sidebar shows the user role as 'Administrator' with a dropdown arrow. The menu items are: Dashboard, Lesson Content, Objectives, Organizations, Persons, Devices, Applications, Content Packages (highlighted in blue), and Subscriptions. The main area is titled 'Content Packages' and features a '+ Create' button. Below this is a table with three columns: Title, Description, and Policy. The table contains ten rows of content packages, each with a checkbox in the first column.

☐	Title ↑↓	Description ↓↑	Policy ↓↑
☐	Altrad Werken Op Hoogte		Preload
☐	Beurs Hannover Messe Test 1		Preload
☐	Constructiv Festival		Open
☐	Externe Testsessies XR Instructor	Enkele apps voor te testen met de instructor app	Preload
