

How to design XR Procedures

Using the XR Platform

Note

Make sure you have the **Designer or Administrator** role. You can change roles by clicking on them and switch to another one in the list.

This is the **hierarchy of projects, procedures and steps**:

Project

- Procedure A
 - Step 1
 - Step 2
 - Step 3
- Procedure B
 - Step 1

All the procedures you create are managed in projects. A project can hold multiple procedures.
