

How to create a Content Package? (Available in 4.1)

You can add a content package to subscriptions. You only have to do this once if you want to distribute the same content.

- Go to the XR Platform

Note

Make sure you have the **Administrator** role. You can change roles by clicking on them and switch to another one in the list.

The screenshot shows the XR Platform interface. On the left is a dark sidebar with a navigation menu. The top of the sidebar shows the user role as 'Administrator'. The menu items are: Dashboard, Lesson Content, Objectives, Organizations, Persons, Devices, Applications, Content Packages (highlighted in blue), and Subscriptions. The main content area is titled 'Content Packages' and features a '+ Create' button. Below the button is a table with columns for 'Title', 'Description', and 'Policy'. The table contains several rows of content packages, each with a checkbox in the 'Title' column.

<input type="checkbox"/>	Title ↑↓	Description ↓↑	Policy ↓↑
<input type="checkbox"/>	Altrad Werken Op Hoogte		Preload
<input type="checkbox"/>	Beurs Hannover Messe Test 1		Preload
<input type="checkbox"/>	Constructiv Festival		Open
<input type="checkbox"/>	Externe Testsessies XR Instructor	Enkele apps voor te testen met de instructor app	Preload
<input type="checkbox"/>	Grootkeuken		Open
<input type="checkbox"/>	Grootkeuken Seperated		Open
<input type="checkbox"/>	Innovet projects		Preload
<input type="checkbox"/>	Interne testing XR Instructor	Enkele apps voor in een subscription om te gebruiken bij de test	Open
<input type="checkbox"/>	Open Definition		Open

- Go to Content Packages and press Create.
