

# Privacy Management on the XR Platform

XR devices and applications may collect and process both personal and “personalizable” data of various types.

The EU GDPR requires that someone is informed as well about which data is collected as about what the purposes are of the processing of that data. Passerelle XR's Privacy Management provides the infrastructure to define and enforce GDPR-compliant privacy policies and to track consent, ensuring that end-users retain control over their data.

The screenshot shows the Passerelle Privacy Management interface. The left sidebar contains a navigation menu with the following items: Dashboard, PLANNING, DESIGN, LEARNING CONTENT, INSIGHTS, IDENTITY & ORGANIZATION (highlighted), Organizations, Persons, Privacy Management (highlighted), and MANAGE. The main content area is titled 'Privacy Management' and includes tabs for Master Data, Policy Definitions, and Consent Monitoring. Below these tabs are sections for Data Collection Topics and Processing Purposes. A search bar is present with the placeholder text 'Enter search string here'. A table lists various data collection topics with the following columns: Code, Title, Type, Sensitivity Level, and Consent Validity. The table contains 20 rows of data.

| Code               | Title                        | Type                          | Sensitivity Level | Consent Validity |
|--------------------|------------------------------|-------------------------------|-------------------|------------------|
| MODULES-COMPLETION | % modules completed          | Performance At Work           | Low               | Eternal          |
| CERT-DATES         | Dates of recertification     | Professional Certification    | Low               | Eternal          |
| STEPS-ERRORS       | Errors made                  | Performance At Work           | Medium            | Eternal          |
| PHY-FIXATIONS      | Eye tracking Fixations       | Behavioural                   | High              | Per Session      |
| PHY-GSR            | Galvanic Skin Response       | Physical Health               | High              | Eternal          |
| PHY-GESTURES       | Hand gesture interaction     | Behavioural                   | Medium            | Per Session      |
| HINTS              | Hints and nudges triggered   | Behavioural                   | Medium            | Eternal          |
| BIO-IRIS           | Iris Scan                    | Retina                        | Critical          | Per Session      |
| IAM-CONTACTINFO    | Name and email address       | Contact                       | Medium            | Eternal          |
| SPATIAL-HMD        | Position and rotation of HMD | Location                      | Low               | Eternal          |
| STEPS-REPEATS      | Repeated actions (redo/back) | Behavioural                   | Low               | Eternal          |
| STEPS-PROGRESS     | Steps completed or skipped   | Performance At Work           | Low               | Eternal          |
| TASKS-SUCCESSRATE  | Task success rate            | Performance At Work           | Medium            | Eternal          |
| STEPS-TIME         | Time spent per step          | Performance At Work           | Medium            | Eternal          |
| TASKS-TIME         | Time to task completion      | Performance At Work           | Medium            | Eternal          |
| BIO-VOICE-CMDS     | Voice command usage          | Voice Communication Recording | Medium            | Eternal          |
| BIO-VOICE-MARKERS  | Voice stress markers         | Biometric                     | High              | Per Session      |

- Go to Identity and organization and press Privacy Management.

## Hierarchy of the Privacy management system

- A Consent Definition is a defined group of multiple Consent Categories.
  - Consent Definition: XR Training
    - Category: Progress
    - Category: AI Modeling
    - Category: Assess certification
    - Category: Record reuse
