

Release notes 4.0

XR Platform

Improvements

- **Improved menu layout**

Redesigned the XR Platform menu for more efficient use and navigation.

- **Terminology update: VR Environments**

“Workplaces” are now called *VR Environments*.

- **Terminology update: XR Procedures**

“Guide Procedures” are now called *XR Procedures*.

New features

- **Privacy & consent management** Introduced Privacy Management, allowing organizations to configure data collection and consent policies. Users may now be asked to provide consent when starting activities on devices, ensuring transparency and compliance with configured settings.

- **Translate XR Procedures**

Translate XR Procedures with a single click.

Users can set their preferred language in their profile to follow a training in their own language.

- **Export sessions (PDF or ZIP)**

Export any session as a PDF report or a ZIP file including recordings, annotations, attachments.

- **Session comments & filtering**

Added a *Commented* column and filter to quickly identify and manage sessions with user comments.

- **License-only subscriptions** Added support for subscriptions used solely for license validation, without requiring devices to send operational data to the platform.
